

Autobud
(Remote)

Frontend App Developer

Company Profile:

Autobud is a student-led startup built to provide people with an app-based vehicle toolkit. We're developing a mobile vehicle companion & idle tracker app to help users reduce emissions, save fuel, and save money. We are currently seeking someone to fill the Frontend App Developer position to aid the development of our pre-launch app. We're a 100% remote team made up of 4 Canadian university students. This is an unpaid position and all members of the team are unpaid – we work on Autobud because we're excited about breaking into the sustainable tech space! <http://www.autobud.ca>

Frontend App Developer Role & Responsibilities:

Key Responsibilities:

- Aid in the frontend development of the main mobile application
- Perform alpha and beta testing on mobile application (iOS, Android)

Competencies:

- Familiar with Dart, Flutter, and Git
- Some familiarity with Firebase database
- Able to write efficient algorithms
- Well organized, with knowledge of documentation and debugging practices
- Fast learner
- Works well in a team environment
- Personal project experience or app development experience is an asset

Apply:

Please apply by sending an email to sonia@autobud.ca with your resume and a short statement of interest. We will be reaching out on a rolling basis, until a suitable candidate is found, to schedule an interview.
